

BENJAMIN WERDEN

[linkedin.com/in/benjaminwerden](https://www.linkedin.com/in/benjaminwerden)

Software Engineer | Automation Architect | Product Owner

Engineering Automation. Building Culture. Driving Change.

Enterprise automation leader with experience building and scaling automation programs that improve business performance, streamline operations, and create lasting organizational capability. Combines software architecture, product ownership, and process optimization to deliver automation solutions that are technically sound, operationally sustainable, and embraced by the business. Experienced leading enterprise automation initiatives from strategy and technology selection through implementation, governance, and ongoing evolution.

CAREER HIGHLIGHTS

- Co-founded Steelcase's enterprise RPA/BPA Center of Excellence.
- Grew automation portfolio to 30+ production automations supporting six business units.
- Generated \$320K+ annualized business savings while avoiding multiple additional hires.
- Led enterprise UiPath selection and established automation standards and governance.
- Architected Azure-native automation platforms, SAP integrations, and enterprise software solutions.
- Served as Software Architect, Product Owner, Business Analyst, and technical mentor across multiple initiatives.
